

I CLAIM:

1. A dustpan comprising:
a housing, and
a casing pivotally attached to said housing, and rotatable
5 relative to said housing between an upward folding position and a
downward working position,
said casing including a chamber formed therein for receiving
dirt, and defined by an upper panel, a bottom panel, and two side
panels, and including a front opening formed therein, and including
10 at least one projection extended forwardly from said upper panel of
said casing, and extended into said front opening of said casing, for
dust removing purposes.
2. The dustpan as claimed in claim 1, wherein said housing
includes two side walls, said casing is pivotally secured between
15 said side walls of said housing.
3. The dustpan as claimed in claim 2, wherein said side panels
of said casing are pivotally secured to said side walls of said
housing with pivot axles respectively.
4. The dustpan as claimed in claim 2, wherein said housing
20 includes a space formed therein, and defined by said side walls, to
partially receiving said casing.
5. The dustpan as claimed in claim 1 further comprising a
broom having a brush member, said housing including a front wall
having a recess formed therein to partially receive said brush
25 member of said broom.
6. The dustpan as claimed in claim 1 further comprising a
broom having a hand grip and a brush member, said housing

including a handle for supporting said hand grip of said broom.

7. The dustpan as claimed in claim 6, wherein said housing includes a catch attached to said handle, for detachably retaining said hand grip of said broom to said handle of said housing.
